

FORUM PROGRAMME

Security & Defence Learning Forum 2012

SDL EDUCA

SECURITY AND DEFENCE LEARNING FORUM (November 28th)

KEYNOTE SPEECH (10.00-10.30)

Session 1: Responding to New Threats to Information and Data Security (Wednesday, 10.30-12.00)

Information security is crucial to modern economies and societies. How can we overcome emerging threats to information and data systems? How safe is data outsourcing? Is cloud computing the answer? Does encryption work?

LUNCH BREAK (12.00-13.00)

Session 2: The Impact of Gaming on Security-related Education and Training (Wednesday, 13.00-14.30)

Can gaming truly provide adequate training and improve real-time performance? Does experience acquired via gaming translate into improved responses? What has been the experience of security, defence and emergency services? What is the future potential of gaming for security-related learning and training?

COFFEE BREAK (14.30-14.45)

Session 3: Maximising the Contribution of Mobile Technology to Security learning and Training (Wednesday 14.45-16.15)

How does mobile technology contribute to improved teaching and learning capabilities? What has been the experience of trainers, teachers and students? How can mobile learning contribute to new security solutions? How is mobile technology redefining education and training solutions for security learners?

COFFEE BREAK (16.15-16.30)

Security & Defence Learning 2012

The 8th International Forum on Technology Assisted Learning and Training for Defence, Security and Emergency Services

Session 4: Innovation and Implementation: Approaches and Perspectives (Wednesday, 16.30-18.00)

How can new security solutions be developed successfully? How can we encourage innovation? How can new solutions be implemented most effectively? How can we measure success? How can a different approach to methodology improve responses to an ever-changing environment?

AFTER-FORUM LOUNGE (Wednesday, 18.00-19.30)

SDL EDUCA (November 29th & 30th)

November 29th

Breakfast Session (Coffee and Croissants): What education professionals can learn from the security and defence industry (Thursday, 07.45 -08.45)

There is a close relationship between the security sector and the world of learning. Defence, security and emergency services are major consumers of learning and training products. They also provide a huge impetus for research, development and new thinking that often finds its way into mainstream education. What are the current priorities for security trainers? What can mainstream educators learn from the security sector? How can you develop new business?

SPECIAL EVENT:

THE EURO CRISIS – CONSEQUENCES FOR SECURITY

(Thursday, 12.00 – 14.00. The Ellington Hotel, Nürnbergerstr. 55)

What are the possible security consequences for European countries of a break-up of the Euro? Could the end of the European Union follow? What would be the security implications? What are the possible scenarios and how would they affect us?

Session 1: SDL Lab – How to Improve Your Online Security

(Thursday, 14.45 – 16.00)

Learn the basics about improving your online security. Find out how to create a safe password. Get the latest advice about how to protect your personal information. Discover the best ways to make your communications secure. Join top security experts for SDL Educa's interactive security training session.

November 30th

Session 2: Piracy, Privacy, Personal Identity and Security

(Friday, 11.45 – 13.30)

This session will consider preventing or limiting manipulation, fraud, plagiarism and the obtaining of information from the Internet. Is this a problem or an opportunity for the technology industry? Who controls distribution of content?

Session 3: Nightmare on Web Street

(Friday, 16.30-18.00)

There are new dangers lurking in the shadows on Web Street. How vulnerable are we? What can we do to minimise the risks and limit our exposure? Can we ever really protect ourselves? Can we control what people can learn to do on the web? Should we? Learn what is 'out there' and what we can do about it.
